

# Briefing Vilma 2.7.0

## Spring 2024

## Content

- Timetable for implementation
- Hands-on transition management
- Focus Biocides and SCIP No. – new legal requirements
- Changes and areas of use in trade
- Changes in IN-file with example
- Access to documentation
- Questions and concerns

## Timetable for implementation Vilma 2.7.0

Version	Type of change	Decision	Documentation	Release	Operational implementation (Last introduced)
2.7.0	Mellan	2023-11-30	2023-12-29	2024-05-28	2024-09-02

### 29 dec (2023)

Documentation about the release is available on Byggmaterialhandlarna's intranet (KEYnet)

### 28 May

Release of Vilma 2.7.0 and the first day you can submit files according to a new version for approval at Finfo.

### 2 September

This day is the deadline for the introduction of Vilma 2.7.0. This applies to both suppliers (information providers) and retailers (information recipients). If you have not changed the version by this time, you will be temporarily suspended from the Vilma flow until the upgrade has been made.

## Hands-on, Transition Management – Supplier (Information Provider)

- Notify to Finfo that you are ready to test and to get your files approved (Declaration) for Vilma 2.7.0 by filling out this form;

<https://www2.finfo.se/deklaration-av-vilmarelease-2-7/>

- Then send your article file according the regular handling to Finfo,
- Finfo Checks your information and will let you know if anything is missing or needs to be changed in order to get approved
- Finfo will notify you when you are approved for the new version

## Practical Transition Management – Retailers (Information Recipients)

- Inform Finfo when you want to switch to Vilma 2.7.0 by emailing [info@finfo.se](mailto:info@finfo.se)
- Finfo will contact you and plan the transition
- When the information has been successfully transferred, the flow for Vilma 2.6 will be shut down

## Practical Transition Management - Tests

- Finfo will provide test files for those of you who want to verify your solution, these are available from 1/5
- If you are interested in test files, please contact Finfo
- The same applies if you have questions related to the test files or other practical things about test verification
- Contact Finfo on this E-mail: [info@finfo.se](mailto:info@finfo.se)

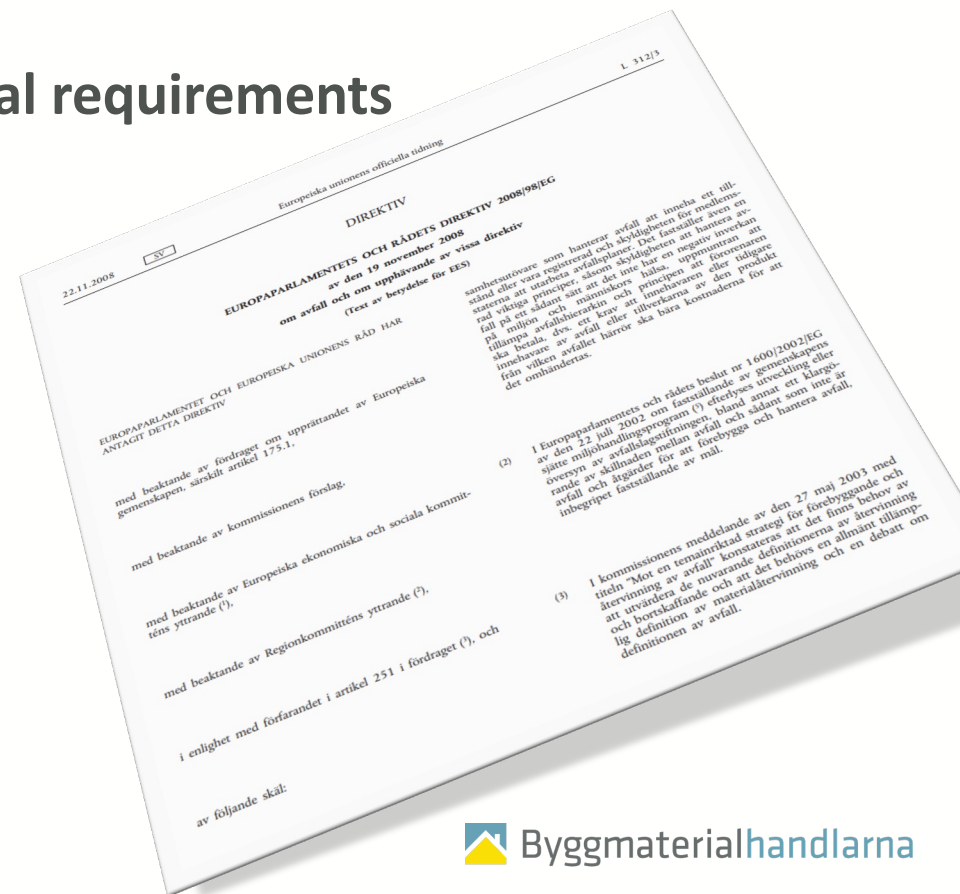

# New information fields, background

# Focus Biocides and SCIP numbers – legal requirements

## LEGAL REQUIREMENTS FOR CHEMISTRY

Here we often see that things go wrong, the subject is difficult and in many cases it is difficult to interpret legal requirements.

**Think about who is it in your organization** that can answer to this questions, or if you need to request information from suppliers or subcontractors.

## BIOCIDES

For example, it can be disinfectant, mosquito repellent, wood preservative, rat poison or protective paint for boats.

Biocidal products that act chemically or biologically are covered by biocidal legislation.

Biocidal products, on the other hand, that act in a physical or mechanical manner are not covered by the rules on biocides. A mechanical mousetrap is an example of such a product not covered.

## BIOCIDES

In order to sell biocides, the trade needs to have access to the product's **registration number** and, if there is one, the date when the **resale prohibition** for the product occurs.

Different requirements in Sweden or if the product is approved within the EU by ECHA.

► Produktuppgifter

Produkt	MyggA Natural Spray
Huvudgrupp	Biocidprodukt
Regnr	4901
Innehavare	Jaico RDP n.v.
Ombud	Midsona Sverige AB
Godkänd/Ändrad	2021-12-16
Godkännande upphörde	2023-12-13

Godkännande för bekämpningsmedel är tidsbegränsade och kan ändras.  
Klicka här för att se samtliga beslut som rör produkten.

**Utfasningsinformation**

Försäljningsförbud fr.o.m	2024-06-10
Återförsäljningsförbud fr.o.m	2024-12-12
Användningsförbud fr.o.m	2025-12-12

Beredningsform: Oljelöslig lösning  
Verksamma ämnen: Citroneukalyptusolja, hydratiserad, cykliserad 33,71 vikt-%  
Övriga ämnen:  
Behörighetsklass: 3  
Användning: Mot mygg, knott och andra bitande flugor.  
Upplysningar: Minskar risken för bitt av fästing.  
Beslutsdokument: Godkännandet kan komma att återkallas eller ändras innan godkännandetiden löper ut, i enlighet med vad som följer av beslut om det verksamma ämnet i produkten som fattas i 4901\_Beslut\_2021-12-16.pdf

When the purpose of the treatment is to give the product a function, for example, to make a sports shirt odorless or a cutting board antibacterial.

Other examples of goods that may be treated are building materials, boats painted with special boat bottom color to protect from algae and shells, impregnated wood, shoes, mattresses, cleaning materials and more.

## **BIOCIDES-treated article**

A biocide-treated article is an article that has been treated with a type of pesticide, a so-called biocidal product.

There is requirements for labelling and information on the product, but it is also important for e-commerce, customers should be able to make a conscious choice at the time of purchase.

Vilka **skyldigheter** har du?

#### Definitioner

#### Vad behöver du göra?

## SCIP-number

From January 5<sup>th</sup> 2021, manufacturers, importers and distributors of articles must notify

**the presence of substances of very high concern in their articles**

to the so-called SCIP database of the European Chemicals Agency (ECHA).

## Who should report to SCIP?

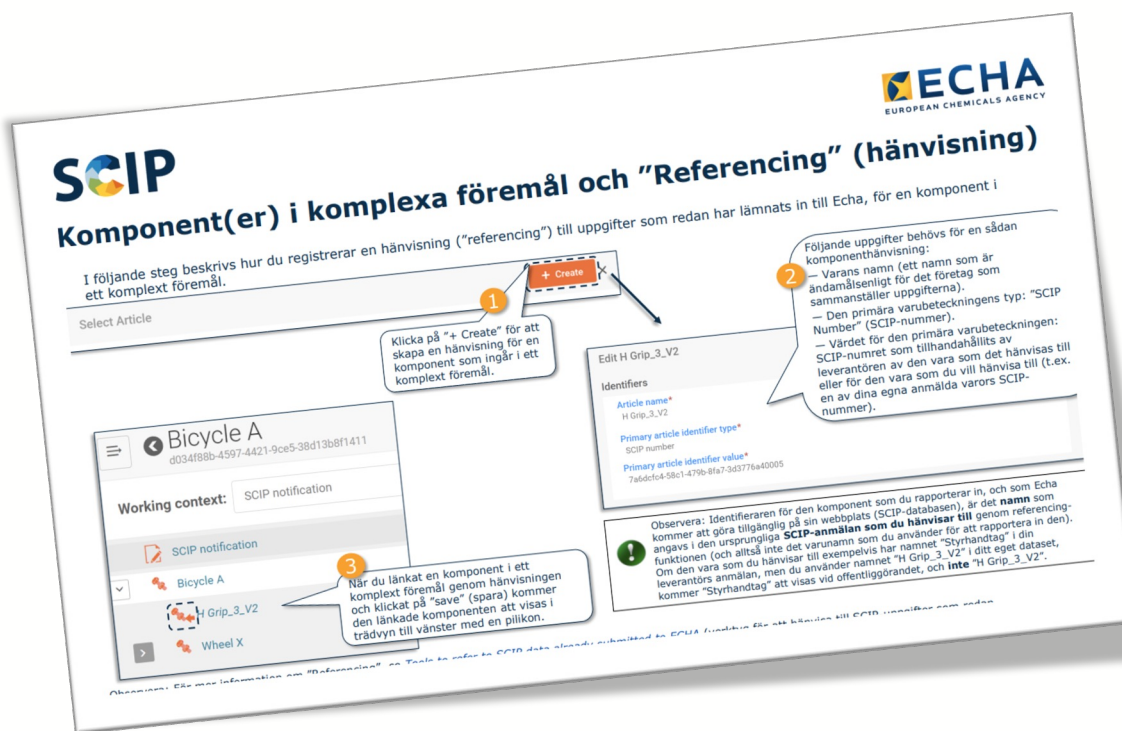

The following suppliers of goods within the EU must notify the SCIP database:

- manufacturers
- importers
- distributors

A company that imports goods from a country outside the EU/EEA is an importer.

A company that buys a product from a supplier within the EU is counted as a distributor if the company resupplies the product.

Lego manufactures, fitters and subcontractors are also examples of suppliers covered by the rules.

## SCIP Number at Registration

Refer to information submitted by someone else

The retailer, the next recipient down the supply chain, will normally refer to information that someone else has already submitted to SCIP, through so-called Simplified SCIP notification.

The referral requires a pre-existing SCIP number

("Simplified SCIP Notification") and referral ("Referencing").

## GLN = Global Location Number

- We are introducing GS1 identifiers for contract parties and locations in Vilma
- The first step will be to identify your company as a provider of information
- In future versions, we will probably introduce more options to identifications, such as which GLN you use for orders in an EDI flow
- We will also phase out the number we currently use to identify a provider of information

## Changes and use of information

Change	Field heading	Description	Mandatory	Use
Addition	Biocidal product, registered where?	In the case of biocidal product, specify where the product is registered.	To be stated if the product is subject to Biocidal legislation requirements	For the retail to know where to look for registration and what legislation has been followed
Addition	Registration number biocidal product	Enter the registration number from the relevant biocidal register	Depending on other fields BIOCREG= 1	For the retail to use when searching for registration in the Swedish register. There is no corresponding number in the EU register.
Addition	Class of biocide	Enter biocide class	Depending on other fields BIOCREG=1	If the article is registered in a Swedish register, the trade must be able to report the class of biocide the product contains
Addition	Article code 21	Is the article biocide-treated?	Yes	When purchasing an item, the retail sector is required to inform the customer if the article has been treated with biocide. A biocide-treated article is not the same thing as being covered by the biocidal legislation where the article contains biocide.

## Changes and use of information

Change	Field heading	Description	Mandatory	Use
Addition	Date of resale prohibition	<p>Resale prohibition can be of two types; permanently or temporarily.</p> <p>When the prohibition is <b>permanent</b> a status code for outgoing handling must also be filled in.</p> <p>When the prohibition is <b>temporary</b> without outgoing handling then the date is removed when there is no longer a resale prohibition.</p> <p>Biocidal products that are no longer allowed to be sold by the retail are seen as a permanent ban on resale. The date on which the biocidal product may no longer be sold in the trade must be indicated.</p>	To be submitted when dates are available	The retailers removes the product from the assortment on this date and no longer sells to its customers. The deleted is either permanent or temporary.
Addition	SCIP-number 1 and 2	Enter the article's SCIP number if it is subject to SVHC legislation.	Mandatory to indicate whether the article is covered by the SVHC legislation	The retailers uses the SCIP number as a signal to apply for the SCIP number for the item, which is a legal requirement for sales.

## Changes and us of information

Ändring	Fältrubrik	Beskrivning	Obligatorisk	Användning
Addition	End date for EPD	Date when the EPD is no longer valid	Dependence ARTKOD17 = 1	For the retail to know when an EPD is no longer valid, to update the link to the new EPD.
Change from optional to mandatory	Brand	Name of the brand of the item	Yes	For the retail trademarks are important information that they always want to be informed about. To have the information equivalent we use a list of approved trademarks that Finfo verifies.
Addition	Sub-brand	The second lower level of the brand. A sub-brand can be a product line or a specific model.	No	Complementing brand information to be used in, for example, filtering on e-commerce
Addition	Artikelkod 20	Does the retail need to take batch into account when selling?	Yes	The retail can increase its service by clearly seeing that when selling, the same batch number must be sold to the customer to avoid differences between batches.

## Changes and use of information

Ändring	Fältrubrik	Beskrivning	Obligatorisk	Användning
Changing Data Type N to AN	Temperature sensitive	Minimum storage temperature in degrees Celsius.	Mandatory to indicate whether the product is temperature sensitive.	To avoid problems with 0 or null and to enter values below 0 by entering (–) minus The retail then have more accurate information.
Change, no longer used in the IN-filen	ETIM-class	The associated ETIM class of the article according to ETIM's model	No	The retail still wants ETIM class to be declared in the additional service from FINFO.
Addition	Disclosure's GLN	Enter the GLN of the legal entity responsible for the information. GLN is a globally unique and unique number.	No	Preparation to replace our supplier number in the Vilma flow with GLN that is globally accepted and in line with goals for Vilma's continued development

## Changes and us of information

Ändring	Fältrubrik	Beskrivning	Obligatorisk	Användning
Change from optional to mandatory	Statistical code (Intrastatnummer)	Statistical Product code (Intrastatnummer) Code for Swedish Customs' requirements for codification of goods that may be imported or exported. Indicated by 8 or 10 digits. Finfo checks that the specified number is found in the Customs Tariff.	Yes	Used by the retail for regulatory reporting and when selling outside the EU. The retail sector would like the information to be submitted by 10 digits.

## Changes and use of information

Ändring	Fältrubrik	Beskrivning	Obligatorisk	Användning
Change from optional to mandatory	Items country of origin	Indicates the country of origin of the goods. According to ISO 3166-1 alpha-2	Yes	<p>Used for reporting together with statistics, commodity code and as information to customers.</p> <p>In the case of production in several countries, the country where the most production takes place is indicated if the same GTIN is used.</p> <p>Should there be more countries that are still relevant, the country where the trade has the greatest value in terms of market value in knowing is stated.</p> <p>In future versions of Vilma, we are reviewing the possibility of being able to specify several countries so that the picture of manufacturing countries is complete.</p>
Addition	Effective sale price date	Date when the sale price becomes effective	Dependence PC1	To control when the selling price can be used in the trade

## Changes in IN-file with examples

KNINFOGLN

4892210000002

### Disclosure's GLN

Global Location Number  
Indicated by 13 digits

KNINTRASTA

44111210

### Statistical code

Indicated with 8 or 10 digits  
according to Swedish  
Customs' customs tariff.

KNVARUM

RYOBI

### Brand

Listed according to the  
report containing  
approved trademarks.

KNURSPLAND

SE

### Country of origin

Specified according to ISO  
3166-1 alpha-2

KNUNDVARUM

ONE+

### Sub-brand

Indicated if relevant as a  
complement to the trade  
mark.

## Changes in IN-file with examples

KNBIOCREG

1

### Biocidal product, Registered where?

Indicate whether the article is a biocidal product by stating where the product is registered.  
1=Sweden  
2= Other country

KNBIOCKL

2

### Biocid class

Stated if the item is registered in Sweden. Biocide class, if available, determines who can buy the product. Ensures the right handling in sales or via e-commerce.

KNBIOREGNR

205-149-7

4875

### Registreringsnummer Biocidprodukt

Anges om artikeln är registrerad.  
Två exempel där den första är utanför Sverige och den andra är i Sverige.

KNARTKOD21

0

### Is the article biocid treated?

Always indicated by 1 or 0.  
1 = Yes  
0 = No

## Changes in IN-file with examples

KNSCIPNU01

KNSCIPNU02

6496a9db-d817-4758-9a51-7dea6e546e07

### SCIP number 1 and 2

Indicates whether the article is covered by the SVHC legislation.

Use SCIP number 2 for e.g. a package of two products that have different SCIP or if the packaging itself has its own SCIP number.

KNFORBDAT

20241231

### Resale prohibition date

Specify when the item may not be sold any more. The date is the first day the item may not be sold. The date can be permanent or temporary.

## Changes in IN-file with examples

KNPC1DAT

20240331

### Effective sale price date

Stated if the selling price is stated.

KNARTKOD20

0

### Does the retail need to take batch into account when selling?

Always indicated by 1 or 0.

1 = Yes

0 = No

KNTEMPMIN

-15

### Temperature sensitive

Specified if the item is temperature sensitive. Minimum storage temperature in degrees Celsius.

KNSLUEPDDA

20250228

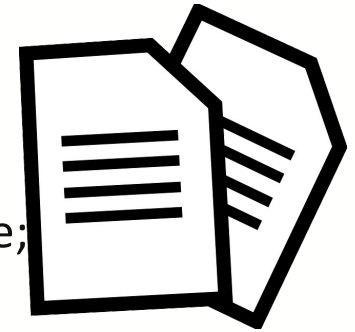

### Last valid date of EPD

Stated if the article has an EPD.
